Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 27-52 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

For examination purposes the examiner will be considering the limitations of "cylinder head" to refer to the cylinder body, and not the head.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 27 – 52 are rejected under 35 U.S.C. 102(b) as being anticipated by Onofrio et al.

The patent by Onofrio (5,083,537) shows a cylinder (11) in which a water jacket (22) is formed around a cylinder top portion. A separate cylinder block (12), forms an engine main body. A main body cylinder (11) has a mounting surface and which

Art Unit: 3747

defines a cylinder top portion side of the water jacket. An outer cylinder (12) is molded separately from the main body cylinder as a cylinder portion which defines a side of the water jacket (22) opposite the cylinder side. The outer cylinder is arranged in a predetermined position so as to be on the mounting surface of the main body cylinder so as to define, together with the main body cylinder, the water jacket. The outer cylinder is fixed in place while pressed between the cylinder block and the main body cylinder while arranged in the predetermined position.

A positioning portion for determining a mounting position of the outer cylinder with respect to the main body cylinder is formed on at least one of the main body cylinder and the outer cylinder.

The outer cylinder head is formed of a resin or a resin composite.

The outer cylinder head is formed of one or two or more materials selected from the group consisting of an aluminum alloy, a magnesium alloy, a resin, a resin composite, and a ceramic.

The main body cylinder is molded by casting using an aluminum alloy or a magnesium alloy.
